TECHNICAL SKILLS

• Programming Languages: C, C++, JavaScript, HTML, CSS, basic PHP
• Desktop Development: Windows application development (.exe apps)
• Mobile Development: Flutter Android app development
• Machine Learning / AI: TensorFlow, Keras, CNN-based image classification
• Databases: MySQL, Firebase
• Electronics: Basic circuit debugging and electronics troubleshooting
• Tools: Microsoft Office (Word, Excel, PowerPoint), Google Workspace
• Skills: Debugging and testing, technical documentation, problem-solving, attention to detail

PROJECTS

CodeSync - C/C++ Collaborative Coding Desktop Application
Developed a Windows desktop application (.exe) that allows users to write, compile, and run C and C++ programs. The system supports both individual and collaborative coding sessions with real-time interaction between users. Built using HTML, CSS, and JavaScript, with Firebase used for authentication and database management. The application is fully developed and deployed for Windows.

RotSpot - AI-Based Fruit and Vegetable Freshness Classifier
Developed a mobile Android application that uses a Convolutional Neural Network (CNN) to classify fruits and vegetables as fresh or rotten. Built using TensorFlow and Keras, and integrated into a Flutter mobile application. The system processes image inputs and provides real-time predictions based on trained data.
